

CR CLASSIFICATION SOCIETY

Diversification and Statute Implementation of CR

Donald CHAO, Chairman
CR Classification Society

2017.5.23

CR Overview

- Founded in 1951
- Headquarters in Taipei
- 5 branch offices:

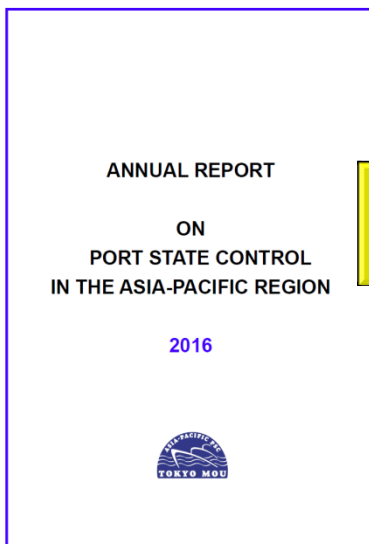

Kaohsiung, Japan, China, Singapore and South Africa

- Authorized by 8 flag States: Taiwan, Panama, Belize...
- ISO 9001 quality management system since 1995
- 108 employees in Taiwan, including 9 doctors and 51 masters
- Classes 386 ships totaling 4,523,000 GT

RO Performance in Tokyo MOU

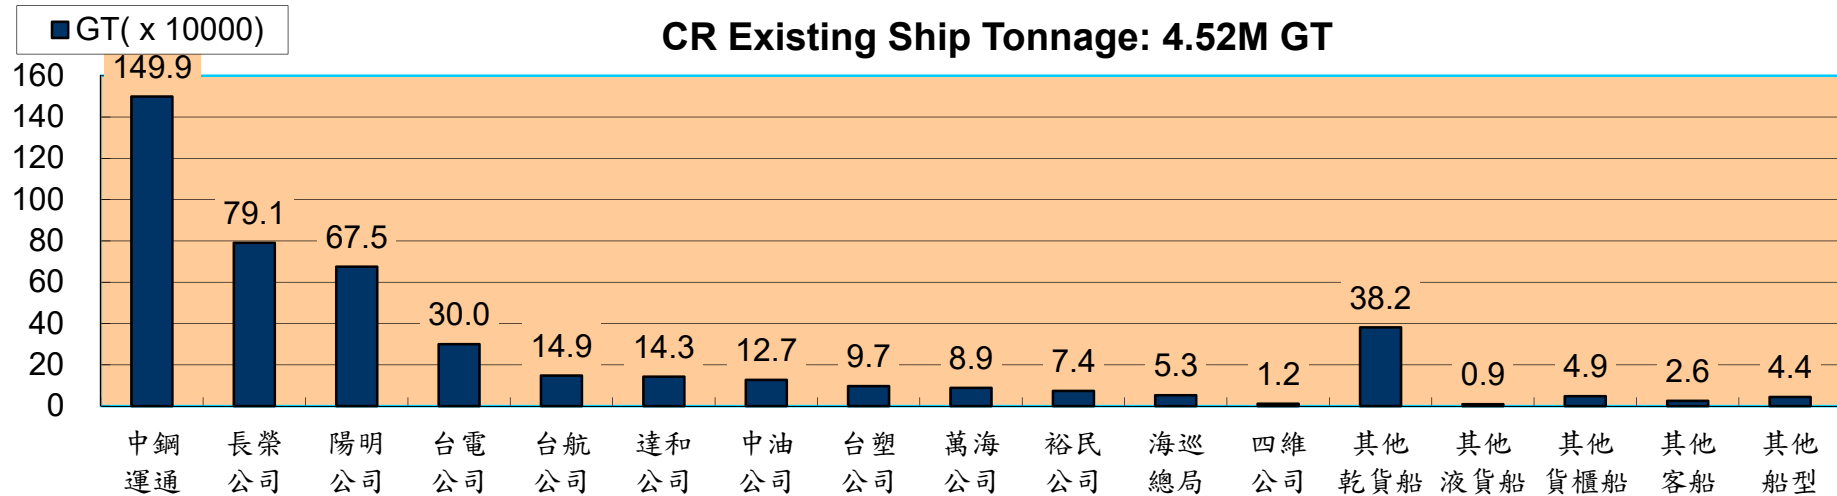

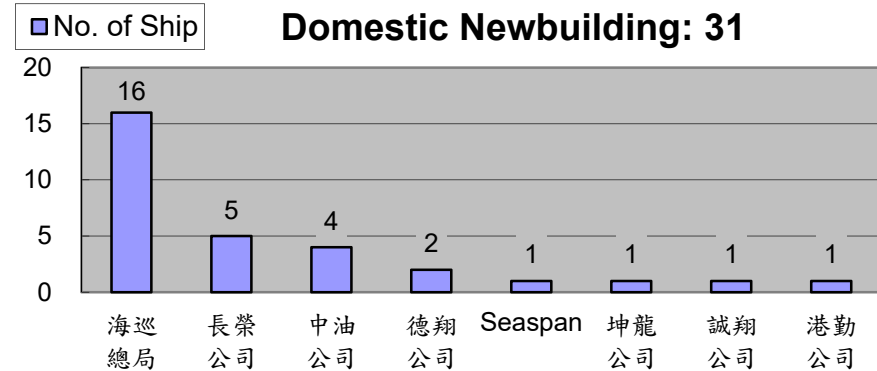

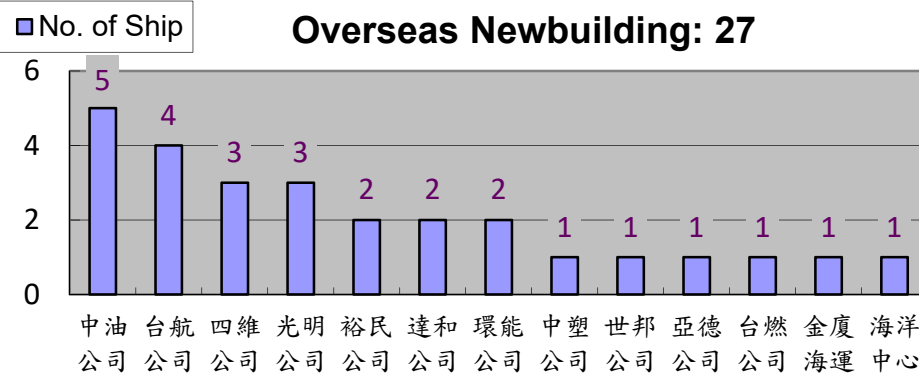

- Ranked 12 out of 83
- 23 in High Performance

Rank	Recognized Organization (RO)	Performance Level
1	China Classification Society (CCS)	High Performance
2	RINA Services (RINA)	
3	Korean Register of Shipping (KR)	
4	Lloyd's Register (LR)	
5	DNV GL AS (DNV-GL)	
12	CR Classification Society (CR)	Medium
23	International Ship Classification	
24~	
~83	Low

Ship Statistics

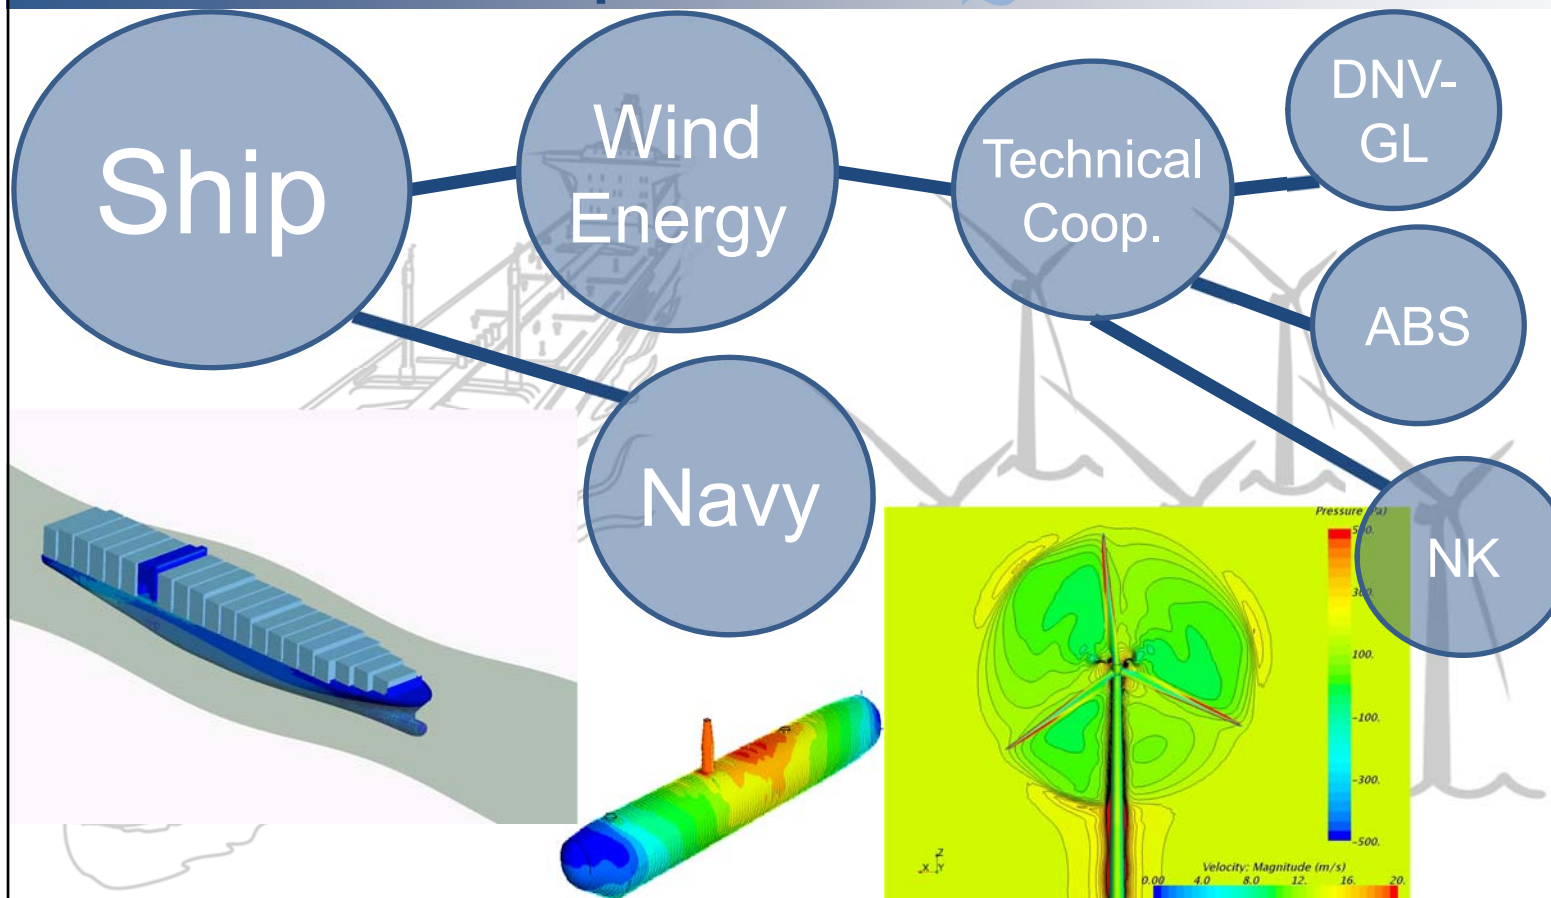

2012 Diversification

From Ship To Wind And Others

Milestone

- 2012.11 - 2014.12
Wind Training by DNV
- 2013.04 - 2014.12
Wind Training by GL
- 2013.12
Licensing for AWS CWI
- 2014.05
Met mast survey with DNV-GL
- 2014.08 - 2015.05
ICP MODU Training by ABS
- 2015.03
R&D Coop. with NK
- 2015.10
MWS Coop. with CSBC
- 2016.05
BSMI team

International Technical Cooperation

2012~2015 DNV-GL + 2014~2015 ABS + 2015~2016 NK

1.load-out

2.transportation

3.self-elevation

8.finish

7.lifting

6.grouting

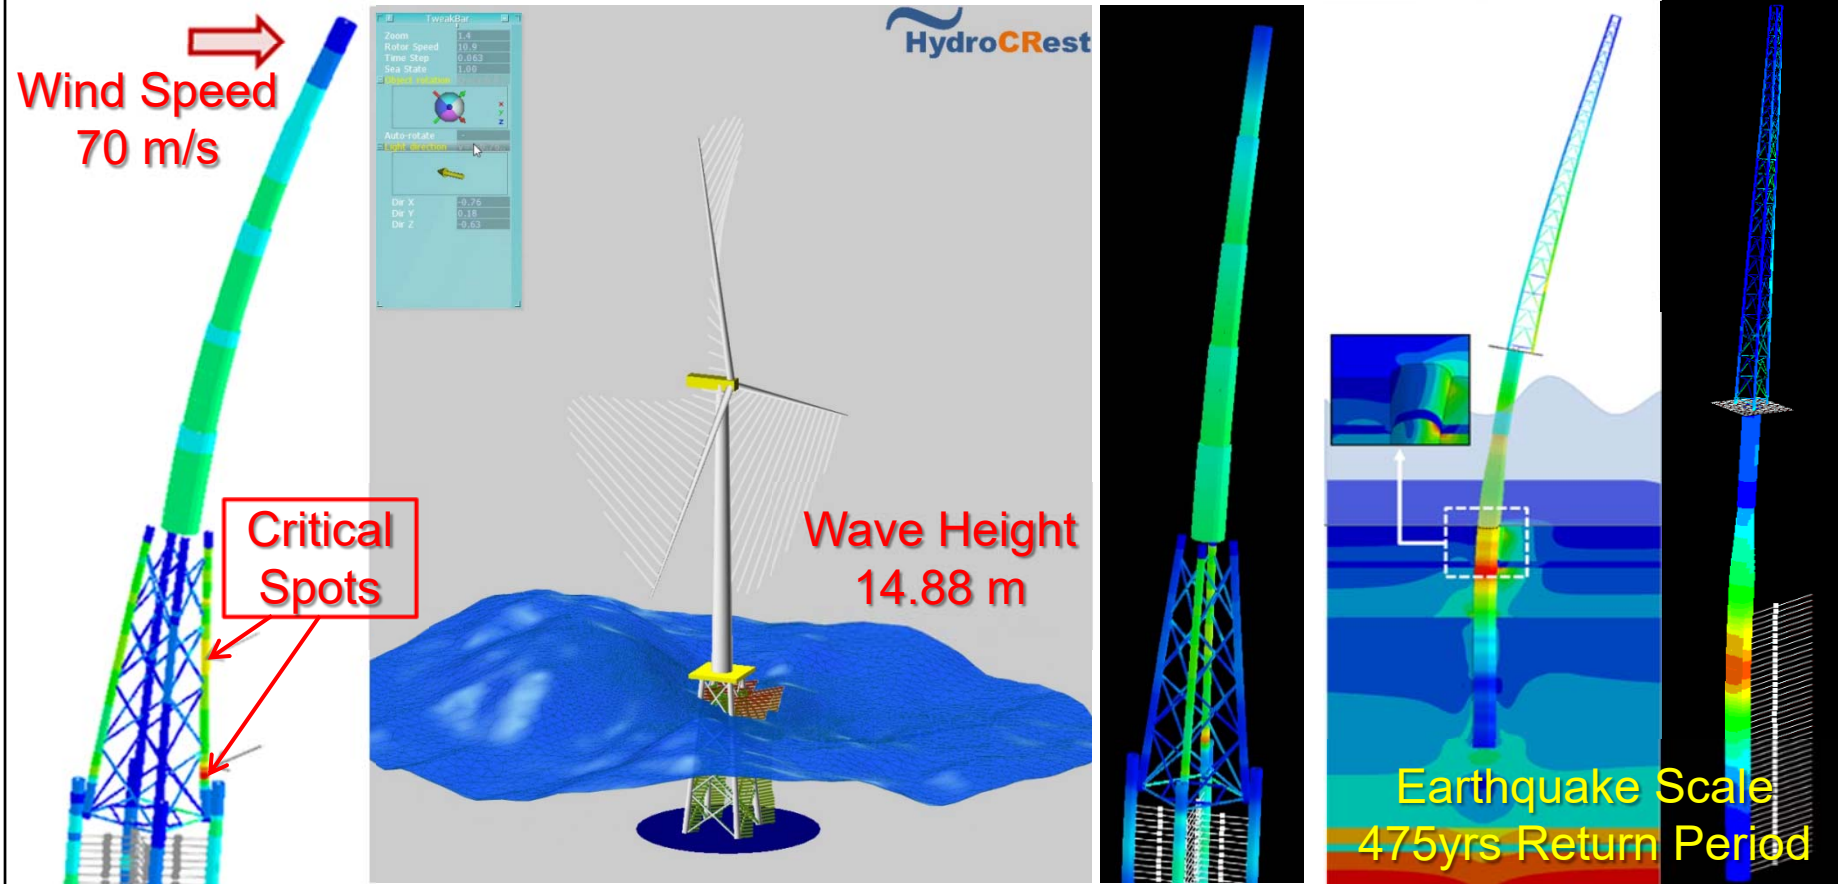

5.lifting

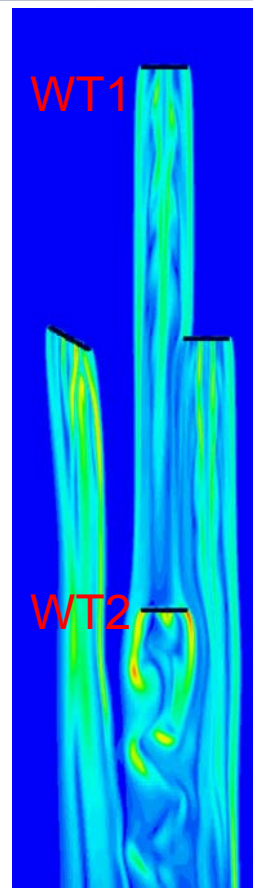

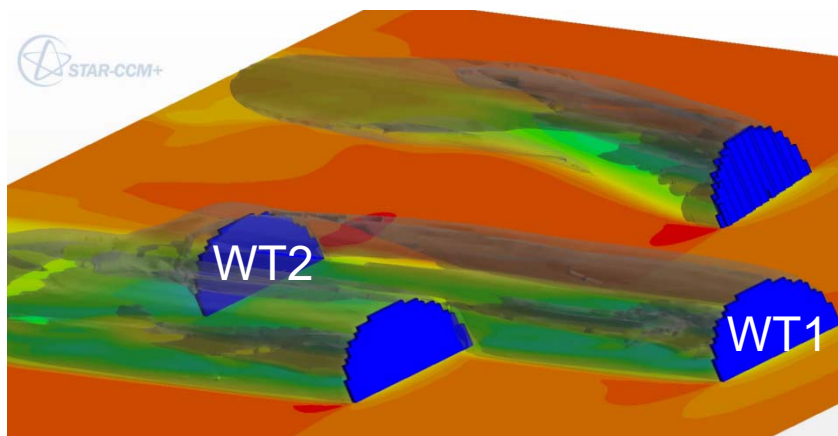

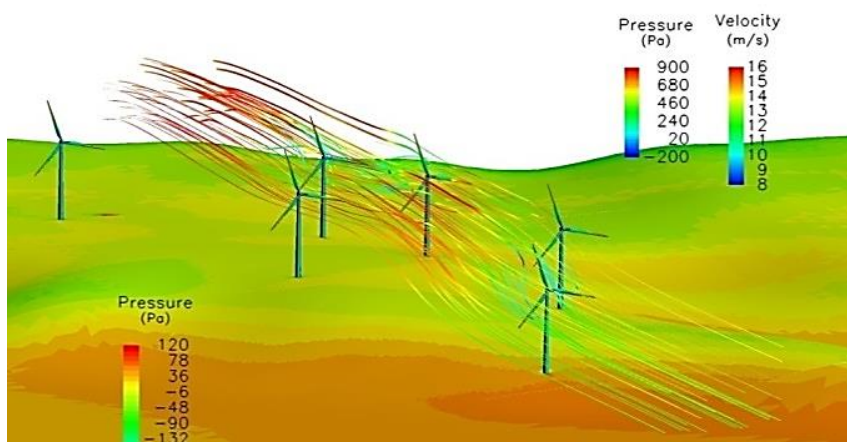

4.piling

2015 Ultimate Strength under Typhoon and Earthquake

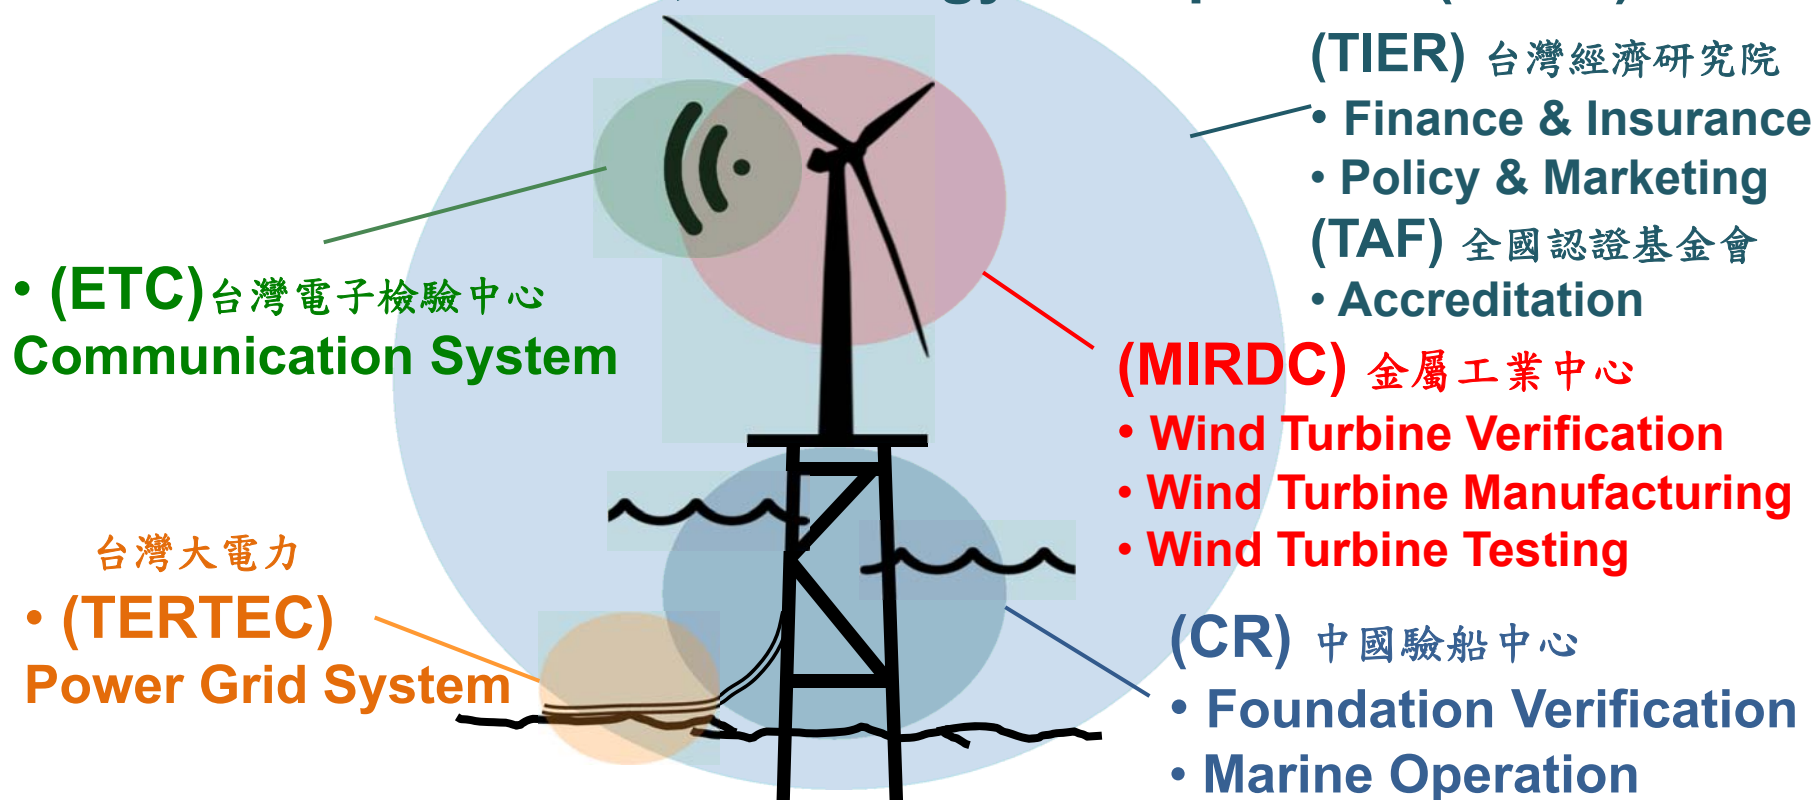

2016 Offshore Wind Turbine Array

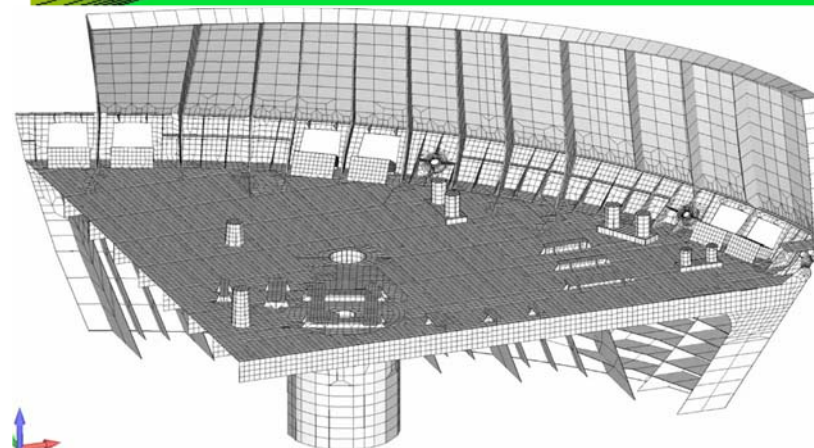

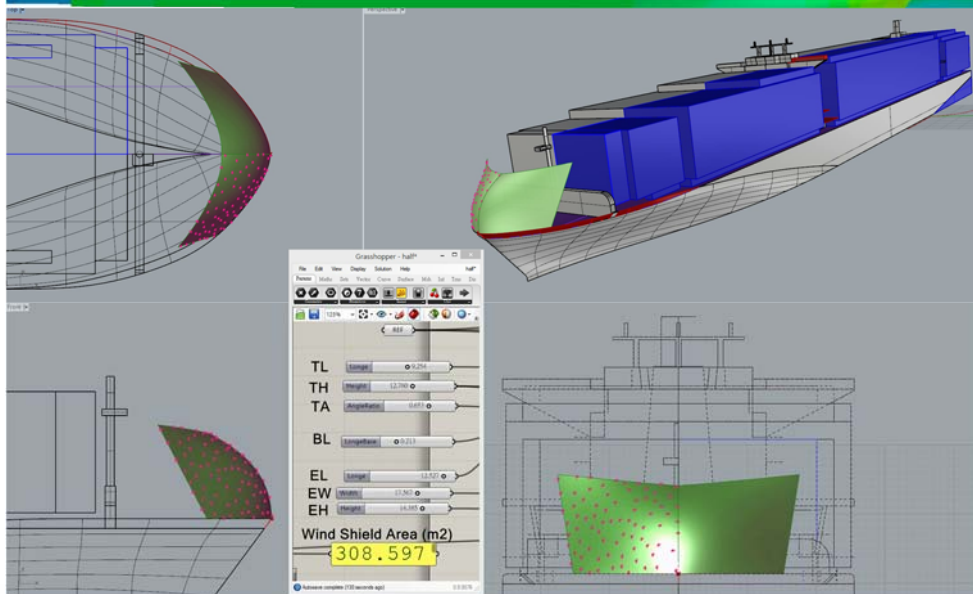

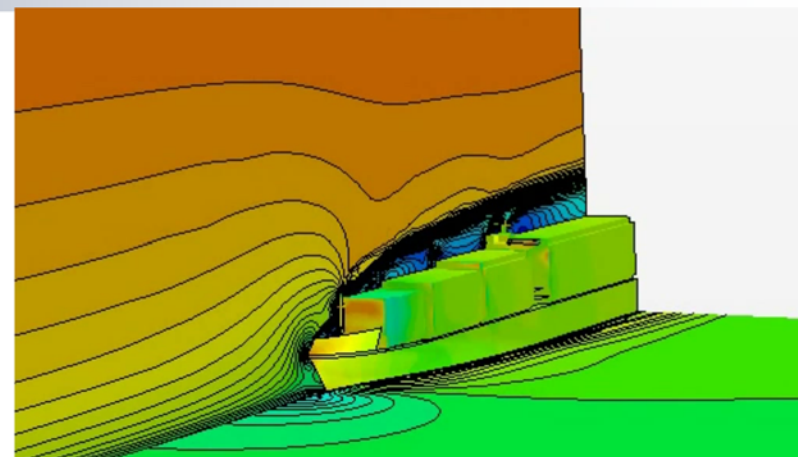

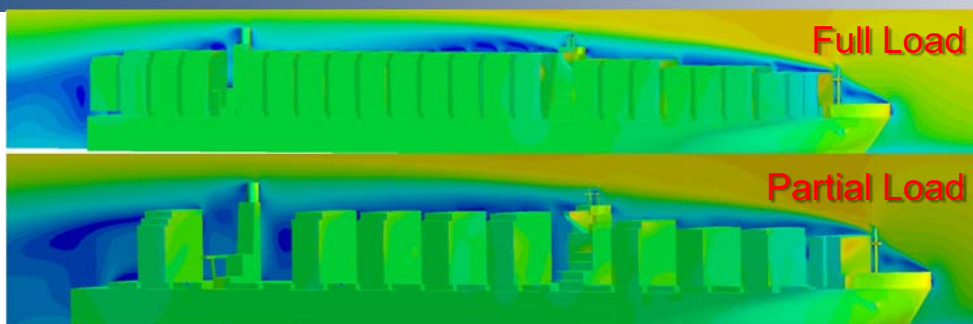

2016-2017 BSMI Technical Team

Bureau of Standards, Metrology & Inspection (BSMI) 標準檢驗局

CR-CSBC Windshield for Container Ship -10% to Wind Resistance

Statute Implementation Ballast Water Management

BWM Convention Implementation Schedule

MEPC 71 (2017/7) will make
the final decision.

De-harmonization of the IOPP Renewal Survey

Some flag states allow IOPP
renewal survey may be
conducted independently :
Taiwan, Liberia, Panama, etc.

Scheme 1

..... Date of entry into force : 2017/9/8

BWM Convention Implementation Schedule

Construction date ↓	2016	2017	...	--
Before Date of entry into force			D-1 / D-2	D-2 only *1
On/after Date of entry into force		N/A	D-2 only	*2

*1 Ship constructed before date of entry into force: shall meet D-1 or D-2 standard until the first IOPP renewal survey completed on or after 2017/9/8, after which time it shall meet D-2 standard.

*2 Ship constructed on/after date of entry into force: shall meet D-2 standard.

Scheme 2

..... Date of entry into force : 2017/9/8

..... 2019/9/8

BWM Convention Implementation Schedule

Construction date ↓	2016	2017	...	--
Before 2019/9/8			D-1 / D-2	D-1 / D-2 D-2 only *1
On/after 2019/9/8		N/A	D-2 only	*2

*1 Ship constructed before 2019/9/8: shall meet D-1 or D-2 standard until the first IOPP renewal survey completed on or after 2019/9/8, after which time it shall meet D-2 standard.

*2 Ship constructed on/after 2019/9/8: shall meet D-2 standard.

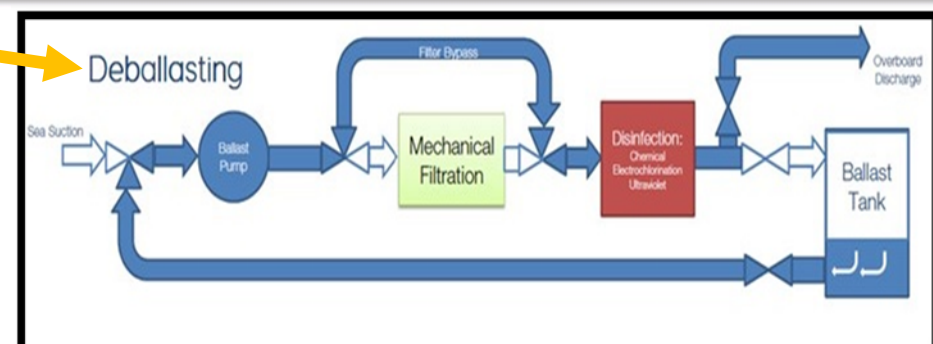

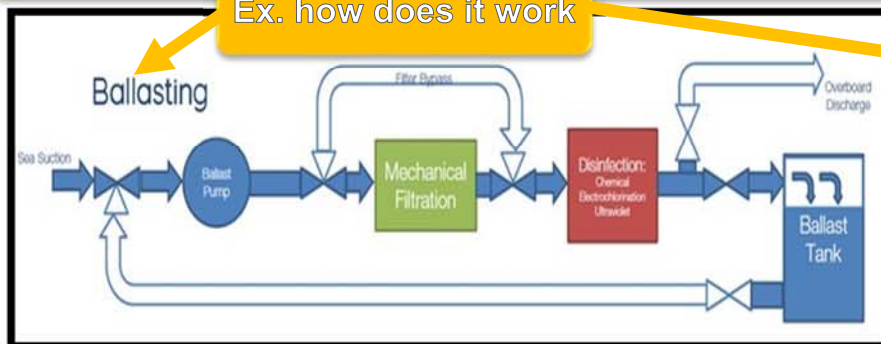

How Ballast Water Treatment Works?

Methods of ballast water treatment

Mechanical	Filtration	Removal of sediments, larges particles or organisms by membranes, disks, screens or magnets
Physical	Ultraviolet (UV) irradiation	UV radiation attacking and breaking the cell membrane killing or sterilizing organisms
Chemical	Biocide injection	Chemical biocides injection (chlorine, chlorine ions, chlorine dioxide, sodium hypochlorite, etc.) killing organisms by poisoning
Chemical	Electrochemical	Electrolysis: generation of free chlorine sodium hypochlorite, causing electrochemical oxidation to kill organism

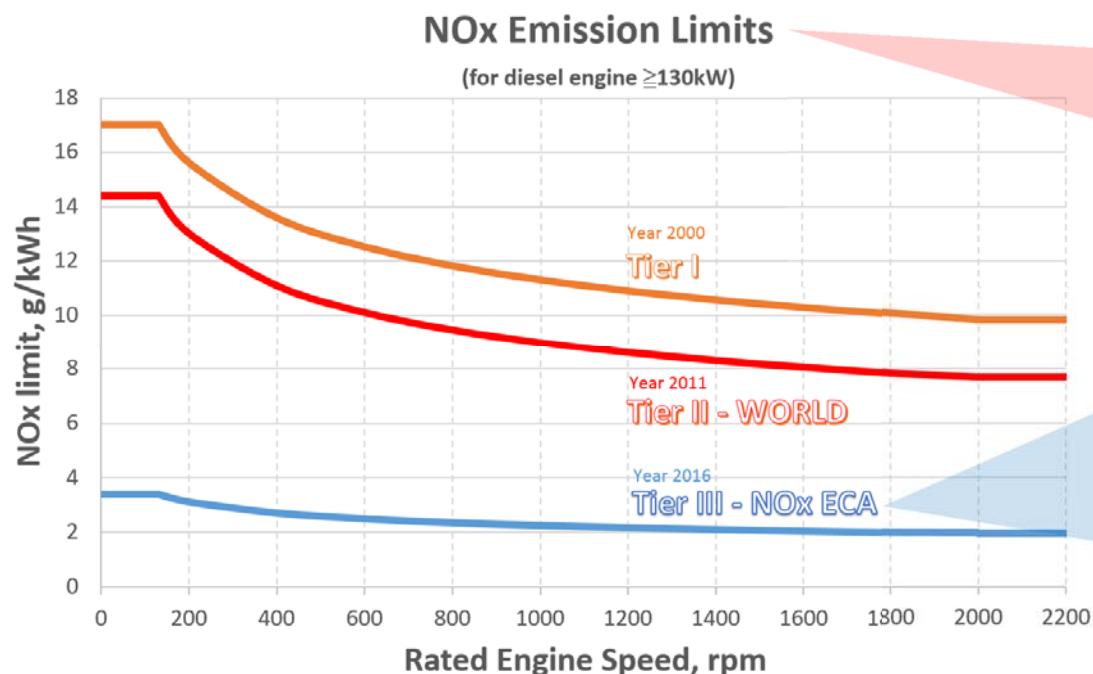

Ex. how does it work

Figures source: <http://www.nepia.com/insights/ballast-water-management/the-challenges/>

MARPOL Annex VI – Regulation 13

Nitrogen Oxides (NOx)

Tier	Ship Construction Date	NOx Limit, g/kWh n = engine's rated speed(rpm)		
		n < 130	130 ≤ n < 2000	n ≥ 2000
I	2000	17	$45 \cdot n^{-0.2}$	9.8
II	2011	14.4	$44 \cdot n^{-0.23}$	7.7
III	2016	3.4	$9 \cdot n^{-0.2}$	2

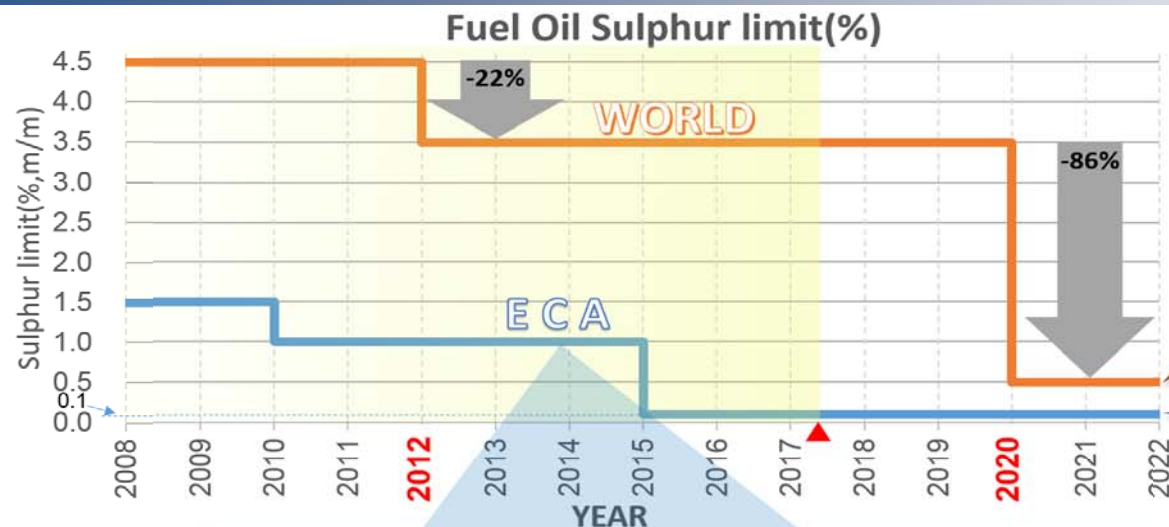

ECA (for NOx) :
North American area
United States Caribbean sea area

Figures source : http://www.gulf-marine.com/service/technical_detail/11

All CR classed ship should comply with the requirement of MARPOL Annex VI Reg.13 and NOx Technical Code

MARPOL Annex VI – Regulation 14 Sulphur Oxides (SOx)

**Global 0.5%
Sulphur limit was
confirmed to apply
from 2020/1/1.**

Inside ECA: 0.1%

ECA (for SOx) :
Baltic Sea area
North Sea
North American area
United States Caribbean Sea area

Figures source : http://www.gulf-marine.com/service/technical_detail/11

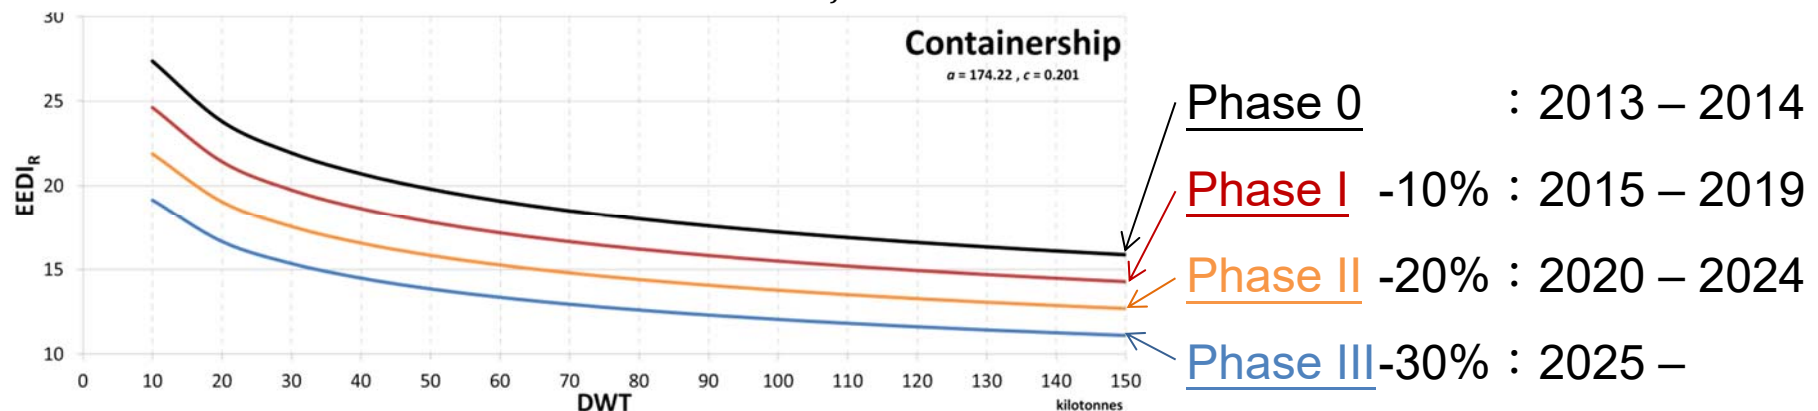

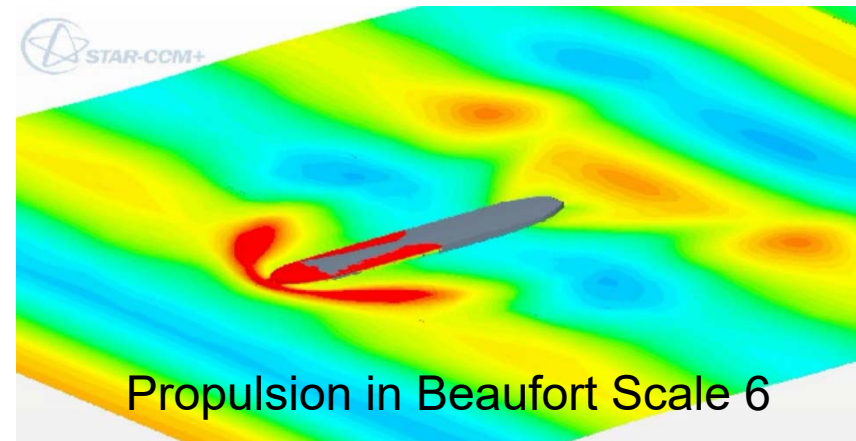

MARPOL Annex VI – Chapter 4

Energy Efficiency Design Index (EEDI)

- **CResta** program (**CR** Electronic Sea Trial Analysis) calculates sea trial data and ships' EEDI_A

$$EEDI_A = \frac{CO_2 \text{ emission} \left(\begin{array}{l} + 1. \text{ Main engine} \\ + 2. \text{ Auxiliary engine} \\ + 3. \text{ Power take in} \\ - 4. \text{ Power take off} \\ - 5. \text{ Power saving device} \end{array} \right)}{f_i \cdot f_c \cdot f_l \cdot \text{Capacity} \cdot f_w \cdot V_{ref}}$$

CR CLASSIFICATION SOCIETY

THE END
